

**Mission:**

To help companies and organizations grow revenues, income, or services using technological expertise, business acumen, and precise execution.

To leverage the maximum business value for every dollar of technology investment made.

To minimize the unwanted intrusion of technology and its details into the operations of our customers.

To treat our customers, vendors, and other partners with respect, fairness and genuine friendliness.

To be a company at which all of our employees are happy and proud to work.

To be committed to the bigger picture; our community, our environment and our future.

Vision:

To become the dominant Managed IT and Network Services Provider in the Portland Metropolitan Region with resulting systems and methodologies that could demonstrably be duplicated in other regions.

Values:

We will execute our missions and realize our vision by:

- Hiring the candidates who show the highest potential to achieve our goals.
- Retaining only exceptional employees who repeatedly exemplify our values, execute our missions, and move us toward our vision.
- Taking care of our employees, our customers, our vendors, and other partners, in this order.
- Accepting only the highest level of competency and execution in our team when creating the solutions and solving the problems for our customers.
- Empathizing such that we make the pains and problems of our customers our own, so we may move to the solution together, as an extension of our customers' companies.
- Treating others, both externally and internally, the way that we would want and expect to be treated.
